Mediterranean Cardiology Meeting

TAORMINA APRIL 26 - 28

2009

welcome address

Dear Colleagues and Friends,

In April 2009 Taormina (Italy) will host the fourth edition of the **Mediterranean Cardiology Meeting (MCM)** whose main target is to give the latest update on:

Patient Care & Monitoring in Cardiology

Over one thousand participants attended our last meeting with a strong international attendance which confirmed the highest interest aroused in so few years by this biannual meeting.

An excellent multi-disciplinary program includes the state of the art on the emerging pathologies as: Atrial Fibrillation, Sudden Cardiac Death, Heart Failure, Acute Coronary Syndromes, Global Cardiovascular Prevention and Syncope, over which several investigators are involved to develop many and more sophisticated pharmacological, electrical or mechanical therapies, and it is developed thorough Courses, Symposia, Debates on Controversial Topics, Clinical Tutorials, Luncheon Panels, Focus on, Meet-the-Expert Sessions, Interactive Cases-Review from Faculty and Attendance, Televoter Sessions, Intercultural Exchanges (Free Communications Sessions) and Poster Session.

An outstanding Faculty, selected between the leading experts on these fields, will provide the highest quality teaching highlighting the current state and limitation of scientific knowledge and presenting a detailed analysis of the most recent developments in the treatment of one, two or most of all the above mentioned cardiac pathologies.

MCM is addressed to cardiologists, internists, first aid clinicians, physicians of general medicine, fellows, nurses and technicians with high interest in the whole management of cardiac pathologies.

Taormina, as one of the historical and cultural world's most famous and warm cities, is the ideal venue for this meeting. It will enchant you with the special kind hospitality of its citizens, the magnificent natural and historical sites as the blue sea and the ancient Greek Theatre, and also with the sounds, colours and flavours of the Sicilian cuisine.

I invite you to join us in Taormina in 2009,

Michele M. Gulizia, MD, FESC
President Mediterranean Cardiology Meeting

general information

CONGRESS VENUE

RUSSOTT HOTEL

Via Jannuzzo, 47 – 98039 Giardini - Taormina, Italy
Tel. +39 0942 51931 – Fax. +39 0942 56128
www.rusott-hotels.it

OFFICIAL LANGUAGE

The official language of the Meeting is **English**.

Some sessions will be translated in Italian.

Some special events (only in Ulisse Room) will be in original faculty language (see program for details).

EXHIBITION

The technical and pharmaceutical exhibitions will be located at the Congress Venue, close to the conference rooms. The exhibition hours will follow the timetable of the scientific sessions.

Companies that are interested in presenting their products or taking up other sponsorship options can contact the Organizing Secretariat, Adria Congrex.

VISA REQUIREMENTS

An official invitation letter for visa may be requested to Organizing Secretariat. This invitation will not imply any obligation from the Organization to provide any kind of financial contribution.

SECRETARIAT AND REGISTRATION DESK OPENING HOURS

For Groups

April 25, 2009 2.30 pm - 6.30 pm

For appointment please contact the Organizing Secretariat

For Individuals

April 26, 2009 8.00 am - 7.00 pm

April 27, 2009 8.00 am - 7.00 pm

April 28, 2009 8.00 am - 5.00 pm

Mediterranean Cardiology Meeting

2009

scientific information

ABSTRACT SUBMISSION

Deadline: December, 19 2008

Abstract can only be submitted on-line to www.mcmweb.it in English. You can find all instructions on the website. The presentation of an abstract requires the registration of at least one of the authors. The authors of the accepted abstracts will receive notification of acceptance by February 15, 2009 together with information regarding their presentation. All the accepted abstracts (if the presenter is regularly registered within **February 28, 2009**) will be printed in a book available at the time of the Congress. The Scientific Committee will review all the submitted abstracts and the selected ones will be accepted as oral communications or posters.

There will be special awards given to “THE BEST COMMUNICATIONS” selected by the Scientific Committee between accepted oral communications and posters

MEETING PROCEEDINGS

The Meeting proceedings containing the texts of presentations of the different sessions included in the Scientific Program will be published by an internationally renowned publisher and distributed to all registered participants during the Meeting.

PROJECTION

PC data projection is available in all the rooms. All projections must be **worded in English only**.

LUNCHEON PANELS

Attendance at all luncheon panels (limited to seat availability) is free for all registered participants.

Critical Care in Cardiology from Simulation to Reality Hands-on Live Course

Directors: **S. Perlini (Pavia), M.M. Gulizia (Catania)**

Tutor: **G. Ferrara (Cefalù)**

Although invaluable, traditional medical learning based on academic study and formal lessons has several shortcomings, particularly when its practical application has to be performed in a context of urgency / emergency. For example, when facing a cardiac arrest the rescuer's "efficiency" not only does rely on his theoretical knowledge of "what should be done", but also critically depends on his practical experience, that allows to manage in the best possible way the available resources and to put into practice all the maneuvers that could be lifesaving in that very moment.

As taught by other non-medical professionals who have safety as the cornerstone of any action (such as in the aviation field), simulation may give a fundamental contribution. Without any claim of substituting the value of clinical practice, this didactic tool allows to acquire experience and clinical competence without exposing the patient to any unnecessary risk, via the reconstruction of specific "real-life" medical scenarios. This is particularly important in those high-risk conditions that leave no room for formal clinical teaching owing to the life-threatening situation.

By inserting a computerized mannequin robot (simulator) in a setting that reproduces the actual environment of an Emergency Department with all its equipments and personnel, it is possible to simulate in a very realistic fashion several emergency medicine scenarios. From a hidden control room the instructors may modify the vital parameters of the simulator and "give voice" to the mannequin making it as a real patient, thereby stimulating the learner to take initiative in that specific clinical scenario. The case is then discussed (the so-called "debriefing") with the aid of a real-time video recording, with the specific aim of identifying the key points of the scenario and to improve the clinical competence of both the learners and the instructors in a "risk-free" realistic situation, as recommended by the International Societies on Medical Simulation.

- 8,30 Welcome Address
- 8,45 Quick revision of the current guidelines on diagnosis and treatment of the main cardiovascular urgencies / emergencies
- 9,45 Clinical scenarios (2-3 learners per 20-minute scenario, followed by a 40-minute plenary session debriefing:
 - **ST elevation acute myocardial infarction**
 - **Sustained ventricular tachycardia**
 - **Angina pectoris in a previously revascularized diabetic patient**
- 12,45 Lunch
- 13,45 Clinical scenarios:
 - **Pulmonary edema associated with hypertensive crisis**
 - **Atrial fibrillation in a patient with depressed ejection fraction**
 - **Syncope associated with torsade de pointes**
- 16,45 CME questionnaire
- 17,30 Conclusions

- Educational credits (CME) upon request
- The Course duration is one day
- See page no. 59 for details

Mediterranean Cardiology Meeting

TAORMINA APRIL 26 - 28

2009

Course Language: Italian
Subscription limited to 20 participants per day

april 26, 27, 28

cariddi room

Advanced ECHO Course *Echocardiographic Assessment of Heart Failure Patients* Pros and cons of new and old echo techniques

Directors: **L.P. Badano (Udine)**, **M. Galderisi (Naples)**, **D. Mele (Ferrara)**

9.00 - 9.15 Welcome and course presentation

9.15 - 10.00 Interactive assessment of a pre-recorded clinical case using workstations

This case will be analyzed by the audience under supervision of course directors. It will be used to identify the strength and weakness of the audience in assessing heart failure patients and as a guide to target next presentations on specific audience needs.

10.00 - 10.30 Left ventricular systolic function

10.30 - 11.30 Interactive work on workstations * (ALL participants)

11.30 - 12.00 Left ventricular diastolic function and the importance of left atrium

12.00 - 13.00 Interactive work on workstations * (ALL participants)

13.00 - 14.00 Lunch

Mediterranean Cardiology Meeting

TAORMINA APRIL 26 - 28

2009

April 26, 27, 28

cariddi room

Advanced ECHO Course *Echocardiographic Assessment of Heart Failure Patients* Pros and cons of new and old echo techniques

Directors: *L.P. Badano (Udine), M. Galderisi (Naples), D. Mele (Ferrara)*

- 14.00 - 14.30** Inter- and intra-ventricular dyssynchrony: myths and facts
- 14.30 - 15.30** Interactive work on workstations * (ALL participants)
- 15.30 - 16.00** How to assess the right ventricle?
- 16.00 - 17.00** Interactive work on workstations * (ALL participants)
- 17.00 - 17.30** Non-invasive hemodynamic assessment of heart failure patients
- 17.30 - 18.30** Interactive work on workstations * (ALL participants)
- 18.30** CME questionnaire
- 19.00** Course closure

* The concepts and statements made by the previous speaker will be demonstrated on pre-recorded cases. Attendance should be able to reproduce the same results through a step-by-step interactive session on workstations under supervision of the speaker.

- Educational credits (CME) upon request
- The Course duration is one day
- See page no. 58 for details

Corso AIAC per Competence in Cardiostimolazione ed Elettrofisiologia per Tecnici ed Infermieri Professionali La Telecardiologia nel controllo dei dispositivi impiantabili

AIAC Course for Competence in Cardiac Pacing and Electrophysiology for Allied Professionals - Remote Control of Implanted Devices

Directors: R.P. Ricci (Rome), S. Sermasi (Rimini), M.M. Gulizia (Catania)

- 9.00 - 9.20** Introduzione: Controllo remoto dei dispositivi impiantabili: una necessità per le strutture ospedaliere e una opportunità per il paziente e per il personale infermieristico e tecnico
Introduction: Remote control of implanted devices: a need to deal with outpatient burden and an opportunity for Patients and Allied Professionals.
- 9.20** Tecnologie attualmente disponibili sul mercato: principi generali e modelli applicativi
Market released technology: general aspects and applications
- 9.50** Come organizzare un sistema di monitoraggio remoto dei dispositivi impiantabili
How to organize remote monitoring of implanted devices
- 10.10** Training del paziente, accettazione e aspetti psicologici
Patient training, acceptance and psychological aspects
- 10.30** Implicazioni di tipo medico-legale: sicurezza dei dati, consenso informato e tutela della privacy
Legal aspects: data safety, informed consent and privacy care
- 10.50** Consumo di risorse sanitarie e sistemi di rimborso
Health care source consumption and reimbursement
- 11.10 - 11.30** Coffee break

Corso AIAC per Competence in Cardiostimolazione ed Elettrofisiologia per Tecnici ed Infermieri Professionali La Telecardiologia nel controllo dei dispositivi impiantabili

AIAC Course for Competence in Cardiac Pacing and Electrophysiology for Allied Professionals - Remote Control of Implanted Devices

Directors: R.P. Ricci (Rome), S. Sermasi (Rimini), M.M. Gulizia (Catania)

Sessione 2: Applicazioni cliniche

Sessione 2: Clinical aspects

- 11.30 Gestione dei dispositivi in "recall" e delle malfunzioni tecniche
Management of "recalls" and malfunctions
- 11.50 Diagnosi precoce e terapia della fibrillazione atriale
Early detection and treatment of atrial fibrillation
- 12.10 Gestione delle tachiaritmie ventricolari nel portatore di ICD
Management of ventricular tachyarrhythmias in ICD patients
- 12.30 Il monitoraggio remoto nel trattamento dello scompenso cardiaco nei portatori di dispositivo per la resincronizzazione cardiaca
Remote monitoring in heart failure management in CRT-D patients
- 12.50 Flusso dei dati e coinvolgimento delle diverse professionalità mediche (medico di medicina generale, specialista dello scompenso, elettrofisiologo)
Data flow and different specialist role (general practitioner, heart failure specialist, electrophysiologist)
- 13.10 - 15.00 Lunch

Corso AIAC per Competence in Cardiostimolazione ed Elettrofisiologia per Tecnici ed Infermieri Professionali La Telecardiologia nel controllo dei dispositivi impiantabili

AIAC Course for Competence in Cardiac Pacing and Electrophysiology for Allied Professionals - Remote Control of Implanted Devices

Directors: R.P. Ricci (Rome), S. Sermasi (Rimini), M.M. Gulizia (Catania)

Sessione 3: Sessione pratica interattiva con i diversi sistemi disponibili Session 3: Practical session using market released systems

Crescita Sostenibile in Aritmologia: Progetti e Risorse *Sustainable Growth in Arrhythmology: Projects and Resources*

Fortunatamente, come in ogni altro settore, anche la medicina continua a progredire contribuendo a migliorare e prolungare la vita dei cittadini-pazienti.

In ambito aritmologico, dove le relative patologie mietono il maggior numero di vittime, questo avviene in modo ancora più evidente e significativo anche grazie allo straordinario contributo evolutivo di sofisticate, ma anche apparentemente costose, tecnologie.

Allora come coniugare il diritto dei cittadini ad accedere alle cure più adeguate ed ottimali con le limitazioni di risorse economiche alle quali ogni giorno veniamo richiamati?

In che modo o con quali progettualità creare più efficienza nel sistema o comunque rendere disponibili più risorse per assicurare l'accesso a cure o interventi di prevenzione adeguati a tutti quei pazienti (aritmologici) che, pur essendo indicati secondo riconosciute linee guida internazionali, oggi non le ricevono?

Parole chiave: aree terapeutiche, ricerca della salute, ausilio della tecnologia.

Fortunately, as in every other sector, also medicine continue its progress contributing to improve and to prolong the life of all people.

In Arrhythmology, where relative pathologies gather the most greater number of victims, this happens even more in evident and meaningful way thanks to the extraordinary evolutionary contribution of sophisticated, but also apparently expensive, technologies. Then how to conjugate the right of the citizens to access the most suitable and optimal cares with the limitations of economic resources to which every day we are recalled? How or with which planning can we create more efficiency in the system or however can we make available more resources to assure the access to adequate prevention cares or interventions to all that patient (arrhythmological) that, even if indicated according to recognized international guidelines, don't they receive those today?

Key words: therapeutic areas, health's search, technology's aid.

registration information

INDIVIDUAL REGISTRATION

Participants are invited to register using **the on-line service** on the web site: **www.mcmweb.it**.

Alternatively, the form can be downloaded from the web site and faxed to the Organizing Secretariat. The registration will be confirmed only if accompanied by payment.

GROUP REGISTRATION

Companies that would like to sponsor the registration fees of a group of participants attending the Meeting should contact the Organizing Secretariat, Adria Congrex (info@mcmweb.it).

A group consists of minimum 10 participants. Registration shall be coordinated by one identified group contact person representing a pharmaceutical/product company or a travel agency.

Congress registration modalities

DELEGATE **Before October 31st 2008**
€ 480,00 Vat 20% included

From November 1st 2008
€ 520,00 Vat 20% included

Registration fee includes: attendance at all scientific sessions including luncheon panels (limited to seat availability), entrance to the exhibition area, meeting proceedings, attendance certificate, CME certificate (for the Italian participants), badge and congress kit, welcome cocktail buffet, and coffee breaks at the Venue.

ACCOMPANYING PERSON

€ 250,00 Vat 20% included

€ 300,00 Vat 20% included

Registration fee includes: entrance to the exhibition area, welcome cocktail buffet and half day excursion.

Hotel Accommodation

HOTEL ACCOMMODATION

The hotel reservation form can be made on line on the web site: **www.mcmweb.it**.

Alternatively, the form can be downloaded from the web site and faxed to the Organizing Secretariat.

As Taormina is a world-wide famous tourist resort, and April is the opening sprinter season, it is highly recommended to book well in advance.

Adria Congrex will make every effort to place you in the hotel category of your choice. A confirmation will be sent starting from February 2009.

Please note that hotel categories and rooms are assigned on a first come first served basis.

Hotel reservation can be made by:

- Paying a deposit for one night accommodation. The deposit paid will be deducted from the hotel bill. The balance will be paid directly at check out. The hotel will provide official receipt for the whole sum.
- Sending your credit card details to be used as a guarantee. The total amount will be paid at check out.

Mediterranean Cardiology Meeting

TAORMINA APRIL 26 - 28

2009

Taormina & congress venue

Volcanic Mount Etna and the Ionian Sea provide the cinema worthy backdrop for Taormina, Sicily's legendary resort town (Italy). Twisting medieval streets and a second-century Greek theater add to its romantic air, which inspired the writings of D.H. Lawrence and Truman Capote. Take a cable-car to the nearby beaches or while away an afternoon on the car-free Corso Umberto I, the main shopping street. Panoramic views await those who stroll uphill behind the Church of St. Joseph to the village of Castelmola.

The Russott Hotel is an elegant stage by the sea, an extraordinary amphitheatre showing you the ancient and eternal Sicilian landscapes. Suggestive lights emphasize the luxury of the spaces. In the 296 rooms of the Russott Hotel, charme and style join to the philosophy of comfort and usefulness. Live your space, across the colours, the

tastes and the smells of the Sicily to love. Russott Hotel is the focal point for important congress meetings and is also an ideal location for relaxing and chilling out under the hot Sicilian sun and the intense colours of the sea and the delightful fragrances of our Mediterranean garden.

excursions

TAORMINA SIGHTSEEING

Settled on a hill of the Monte Tauro, Taormina dominates two grand, sweeping bays on the southern side, the top of Mount Etna, offering a breathtaking, dramatic and view over almost one hundred miles of Mediterranean sea. This itinerary will give the possibility to discover the history and the magical atmosphere of Taormina walking through Corso

Umberto I. It is a lively street that runs through the town, flanked on either side by elegant shop and café and it links Porta Messina to Porta Catania. The civic and religious monuments are concentrated along and around Corso Umberto I: Vittorio Emanuele Square, Corvaja Palace, St. Caterina Church and the Roman Odeum, Roman Baths, Naumachie, IX Aprile Square, St. Agostino Church, Ciampoli Palace, Mother Church, Palace of the Dukes of St. Stephen. The visit will continue to the Greek-Roman Theatre. It was built in Greek times, later enlarged and almost entirely rebuilt by Romans in the second century AD. From the caved, set in a bellow in Monte Tauro, is the view that is as famous as it is beautiful.

ETNA SUNSET & LAVA CASTING

Excursion by bus, tour leader, alpine guide and jeep. Reaching Etna refuge 1800 mts, ascent by jeep to the proximity of the crater area. Stop until sunset and return.

Time for dinner (dinner not included in the excursion price) in a local restaurant at 1800 mts. Warm clothes are recommended and they are rentable on site with an extra charge.

Mediterranean Cardiology Meeting

TAORMINA APRIL 26 - 28

2009

excursions

ETNA

One day excursion by bus with tour leader. Reaching Etna Refuge at 1900 mts. Time for trekking or optional ascent to the area of the main craters with authorized alpine guides. Optional lunch.

ETNA VALLEY - RANDAZZO and ALCANTARA

Our tour will take you first to the Alcantara Gorges for short visit. Entry free not included. Afterwards to the mediaeval town of Randazzo where we visit the Cathedral and the typical Sunday market. Departure to Etna North Refuge at 1800 mts. Free time for lunch (Optional), trekking or reaching the main craters by jeep with authorized alpine guides.

SIRACUSA

One day excursion by bus with tour leader and local guide. Stop halfway before reaching Siracusa. Visit the Archaeological Area with the Greek Theatre, the Latomie's with Dionysius Ear.

2009

practical information

HOW TO ARRIVE TO TAORMINA

Taormina can be easily reached by any means of transport from all over the world fitting any traveller budget.

Catania Fontanarossa International, the nearest and most convenient airport, is km 55 from Taormina. From Catania airport Taormina can be reached in one hour drive by highway A18 direction Messina, highway exit TAORMINA. At Catania Airport: Direct bus to Taormina centre is available

For its charming Sicilian liberty decorative style Taormina's railway station is considered one of the most beautiful in Italy. It offers a large variety of trains, from the deluxe Eurostar to the simple, but very efficient, "Espresso train" normally departing from Milan, Turin and Rome, passing through Naples, Amalfi and Capri. The railway station is only 4 km from Taormina town centre. The taxi parking area and the bus terminal are just opposite the railway station main entrance. From Northern Europe & Italy, it is possible to take a comfortable ship from Genoa port (company Tirrenia) and reach Palermo in about 17/18 hours.

From Palermo, Taormina can be reached by highway A19 (about 2 hours drive). Frequent ferries from Naples to Milazzo (one hour drive to Taormina) and one daily from Ravenna (Adriatic northern coast) to Catania as well as modern speed boats and catamarans daily from Malta to Catania and Pozzallo are also available.

Mediterranean Cardiology Meeting

TAORMINA APRIL 26 - 28

2009

practical information

Sicily and Taormina can be reached by car through highways (green road signs) from the main Italian city. From Northern Italy, you can drive along the highway A1 through Naples and Salerno; then from Salerno (Amalfi coast & Capri area) take the free of charge highway A3 direction Reggio Calabria. Take exit "Villa S. Giovanni - Sicilia", and get to the harbour where very frequent ferries connect the mainland to Sicily 24 hours a day (city of Messina). Once in Messina, take highway A18 direction Catania, drive for about 30 minutes, and take exit "Taormina". If you come from Catania, just take highway A18 direction Messina and take exit "Taormina". If you come from Palermo take highway A20 to Messina, then highway A18 direction Catania and take exit Taormina.

Taormina's modern bus terminal is situated right in the town centre. Frequent buses (Company "Interbus") run from Palermo, Catania (airport included) and Messina. Moreover, there are easy connections from Rome and Amalfi (company Interbusiness), Bari, Brindisi (ferries from Greece) and Taranto (company Etna).

Mediterranean Cardiology Meeting

TAORMINA APRIL 26 - 28

2009

practical information

ELECTRICITY

The electric current in Italy is 220 Volts.

TIPPING

Service is generally included in the bill, tips are welcome if you wish to show your appreciation for a good meal or special service.

CREDIT CARDS

Major credit cards are accepted in hotels, restaurants and shops. If you wish to use your credit card to pay for a taxi, please inform the driver before starting the journey.

SAFETY AND SECURITY

Taormina is as safe as any other European tourist resort and delegates are advised to take the usual sensible precautions. All the hotels can offer security facilities for valuable goods.

INSURANCE

Responsibility for personal accidents or loss or damage to the private property of participants and exhibitors cannot be accepted. Participants and exhibitors are advised to make their own arrangements, with respect to insurance, if they consider it necessary.
